Dear Hiring Team,

I'm writing to express my interest in technical roles within cybersecurity, IT infrastructure, or software development. With over four years of hands-on experience and a strong track record in managing secure systems, building user-friendly applications, and driving innovation through automation, I am eager to bring my skills to a forward-thinking organisation.

In my current role as **IT Manager at Health Academy**, I lead company-wide infrastructure, digital operations, and cybersecurity strategy. I've implemented and enforced threat detection (using **Wazuh SIEM** and **ClamAV**), introduced development pipelines and disaster recovery plans, guided the business through **Cyber Essentials certification**, and am now leading our ISO 27001 compliance. I also oversee our WordPress LMS and e-commerce platforms, where I build and secure custom features using a mix of frontend and backend technologies.

My technical toolkit includes **HTML, CSS, JavaScript, Python, PHP**, and growing expertise in **React 18, TypeScript, Tailwind CSS, Flutter, and Three.js**. I'm currently learning penetration testing and ethical hacking through **OSEP** and **Full-Stack Pentesting Lab**, while also pursuing certifications in **ISO 27001 Lead Auditor** and the **Google Cybersecurity Certificate**.

I'm studying an MSc Level 7 in **Digital & Technology Specialist – Cyber Security Pathway**, aiming for distinction by April 2027. I dedicate one day a week to study and am fully committed to continuing my academic development alongside impactful real-world work.

I am now actively seeking **remote or hybrid opportunities** that align with my skills and interests. I'm particularly drawn to roles where I can continue developing in **ethical hacking, technical security, DevSecOps**, or **platform engineering**, while contributing to a security-minded, innovative team. I am also open to flexible arrangements that support apprenticeship continuation.

Thank you for your time and consideration. I would love the opportunity to further discuss how I can contribute to your organisation's goals. Please feel free to get in touch at your convenience.

Sincerely,

Jonathan Keefe
